PLATFORM SOFTWARE DEVELOPER

Get ready

- to be part of building up an R&D center as a core member
- to build up platform software related competence
- to get involved in development of cutting-edge technologies:
    - Multi-core microcontroller-based application
    - AUTOSAR software architecture
    - Safety and cyber security topics
    - Code generator tools, scripts, development environments
- to use state-of-the-art development tools
- to work in a multicultural environment

What makes you a perfect candidate

- BSc or MSc degree in engineering or science (electrical engineering, computer science, mechanical engineering or similar)
- 1-2 years relevant professional experience
- Experience in C based deep embedded software development
- Knowledge of relevant coding standards (i.e. MISRA)
- Experience with version control systems and application lifecycle management tools
- Good communication and intercultural skills
- Structured working method and analytical thinking
- Proactive, strategical, independent mindset
- Taking responsibility
- Excellent English language skills
- Willingness to travel (few times a year)

What is not expected but makes you outstanding

- Experience or familiarity in AUTOSAR
- Familiarity with safety critical system development standards (ISO26262)
- Commercial vehicle specific know-how (e.g. SAE J1939, etc.)
- R&D experience
- Experience in software development
- Experience in agile methodology
- Chinese language skills

Why you will like to work with us

- Flexible worktime, option for home office
- Benefits
- Spacious brand-new office in the city center
- Good access to public transport
- Room for creativity
- Bunch of young professionals
- Traveling opportunity to one of the biggest countries of the world with fast-growing economy
